## Profile

Software enthusiast pursuing BTech in Computer Science Engineering with strong interest in Web Development, DevOps, and System Design. Focused on clean UI, responsive development, and improving problem-solving through DSA. Preparing for SSC CGL alongside engineering studies.

## Education

### BTech in Computer Science Engineering (2024–2028)

Relevant Coursework: Data Structures & Algorithms, Basic Electrical & Electronics Engineering, Operating Systems, System Design

## Experience

- Developed responsive, clean websites using HTML, CSS, JavaScript.
- Improved UI spacing, animation smoothness, and mobile responsiveness.
- Debugged layout issues and enhanced user experience.
- Practicing GitHub workflows, version control, and beginner DevOps tools.

## Projects

- Portfolio Website:** Built animated, minimal personal website. (HTML, CSS, JavaScript)  
[Portfolio Website](#)
- Utility Tools:** Stopwatch, Calculator, Weather App (API-based).

## Skills

Languages: C, C++, Python (Basics), Java, JavaScript

Frameworks: HTML, CSS, Tailwind (learning), React (beginner)

Tools: Git, GitHub, Vercel, Linux Basics

Concepts: DSA, System Design (beginner), DevOps Basics

## Interests

Web Development; DevOps Engineering; Traveling.

## Certifications & Achievements

- Responsive Web Design Certification – freeCodeCamp (2025)
- Git & GitHub for Beginners – Udemy (2025)
- Hacktoberfest Participant – Contributed to open-source projects (2024)
- College Tech Fest Finalist – Web development challenge (2025)
