Profile

Computer Science undergraduate focused on web development and software engineering fundamentals. Experienced in building responsive web applications using HTML, CSS, and JavaScript with Git-based version control. Developing strong problem-solving ability through Data Structures & Algorithms and exploring DevOps and system design concepts.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering | 2024–2028
Relevant Coursework: Data Structures & Algorithms, Operating Systems, System Design Fundamentals, Basic Electrical & Electronics Engineering

Technical Skills

Programming Languages: C, C++, Java, JavaScript, Python (basic)
Web Technologies: HTML5, CSS3, Responsive Design, Tailwind CSS, React (beginner)
Tools & Platforms: Git, GitHub, Vercel, Linux (basic), REST APIs
Concepts: Data Structures & Algorithms, Version Control, Debugging, API Integration

Projects

Portfolio Website

• Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
• Implemented modern layouts, animations, and mobile-first responsive design.
• Deployed the project using Vercel with GitHub-based version control.

DevBoat AI Chatbot

• Developed an AI-powered chatbot web application enabling users to interact with an intelligent assistant.
• Implemented dynamic chat interface using JavaScript with real-time response rendering.
• Designed responsive UI for smooth interaction across desktop and mobile devices.

DevHabit – Habit Tracker Web App

- Built a habit tracking web application allowing users to create and monitor daily habits.
- Implemented interactive UI components for adding, updating, and tracking habit progress.
- Focused on usability, responsive design, and efficient client-side state management.

Certifications

Responsive Web Design Certification – freeCodeCamp (2025)
Git & GitHub for Beginners – Udemy (2025)
